

## Shaping fair tender evaluations

*An APMP SA and SOEPF White Paper*

APMP published a white paper to present the views of the delegates who had attended the industry sector workshops presented on 22 May 2019 (three workshops) and 23 May 2019 (also three workshops). The paper was submitted to the State-Owned Enterprise Procurement Forum, given the new Procurement Bill pending.

The purpose of these workshops was to discuss challenges and find possible solutions on how to improve tender evaluation in South Africa's public sector. Another objective was to find ways to assist the government with transformation, quality and delivery of objectives.

Despite the division of workshops into different industries, most challenges and proposed solutions apply to all sectors.

Want to find out more read the paper. Want to make a difference, join the conversations.
